

HOW CAN WE HELP YOUR BUSINESS GROW?

Got a great idea for a web venture but don't know where to start?

Thinking about extending your business web services, but don't have the time or technical skills to create it?

Are you looking to cut costs in response to the downsizing of the economy?

Here's how we can help!

1. Lamobdar Inc. specializes in helping you to develop cost-effective custom software for your business and yourself, *without* sacrificing quality.
2. We are experts in designing system architecture for web as well as desktop applications.
3. Our programmers are skilled in a variety of platforms—from PHP to MySQL to Ruby on Rails to Javacript and Visual Basic—just give us a try!
4. We work with both U.S.-based and offshore engineers to deliver the best match of quality and affordability.

WHO WE ARE

Lambodar Inc. is a global provider of dynamic web and software solutions. We specialize in software consulting, cost-effective custom programming, web system development, and server hosting solutions.

Our custom software services cater to clients from all over the globe, including Australia, Mexico, and the United Kingdom. Our many customers range from large multinational corporations such as Warner Bros. to start-up entrepreneurs and "mom and pop" businesses.

Our project managers work extensively with each client to personalize each project. Our goal is to deliver quality services while helping our clients to reduce production costs.

SOFTWARE CONSULTING AND CUSTOM PROGRAMMING SPECIALISTS.

Your Ideas Implemented

F.A.Q.S

Q: I need a website for my business. Can you design it?

A: Our engineers have over fifteen years of combined experience in planning system architectures and executing them. Our graphic designer is also happy to work with you to create a look and feel for your site that represents your business. You are encouraged to bring in your own designer or layouts, and our programmers are more than capable of translating your ideas into a working web system.

Q: Why would I need custom software when I can buy off the shelf programs?

A: You may not. Custom software is not for everyone. Custom software works best when you need business specific programs and can't find an off the shelf solution. Buying custom software also saves on licensing costs. Because you own it, you use it however you like, for as long as you like!

Q: Isn't custom software expensive? Can my small business afford it?

A: Custom software is not just for large businesses anymore. Thanks to a combination effort of both US and offshore programmers and project managers, we can give you quality programming for only a fraction of tradition production costs. Best of all, custom software is tailor-made for you. Because you own your custom software,

you can add on new features as your business evolves—flexibility and scalability is all within your budget.

OUR TEAM

Our talented team of international designers and programmers are skilled in customizing and implementing software across a wide variety of platforms. Their expertise covers a wide-ranging knowledge-base of dynamic software solutions, and we have completed projects in industries from healthcare to finance, retail to social networking, as well as government, insurance, web marketing, and everything in-between.

“Lambodar has been a good investment for me as they work quickly to get what I need done and are careful to make sure I'm happy with the work.”

—Andy Curry, Grizzly Marketing

YOUR SUCCESS IS OUR SUCCESS

We strive to help each client fulfill their business goals by analyzing the needs of their specific market. We work closely

with our clients to produce the best balance of high tech options and project costs.

Armed with a wide arsenal of open-source and proprietary programs, Lambodar project managers work intensively to understand the goals and needs of each client to create the perfect software solution. Our engineers are skilled in programming for a wide variety of platforms, and can create integrated functions from shopping carts to in-depth CRM databases, and even more.

Lambodar has a proven record of the skill and experience needed to deliver world-class, quality services. We have successful projects in industries as far-ranging as: healthcare, finance, retail, government, web marketing, social networking, travel, fitness/sports, and real estate.

Our satisfied customers can attest to the effectiveness of our dedicated research and personal approach.
